SUCCESS STORY

A Southwestern technology firm was retrofitting a community center for its new headquarters. Working closely with the client, architects and contractors, we helped them work within the aging structure's unique challenges to create a workspace that strengthened its brand and fostered a productive and efficient environment.

SMART SOLUTIONS

delivered fast

Our furniture solutions experts are here to support any timeline you're working with, no matter how narrow. We offer quick-ship services on a large selection of items, getting you what you need, fast. Some products can even be ready to ship in as little as two days. So whether you're hurrying to replace a broken chair or rushing to outfit an entire office, Staples is ready to help at a moment's notice.

SUCCESS STORY

When an independent school district received funding for four new schools set to open in under six months, we knew it was important to act fast. Our team sprung into action delivering design services, floor plans and made-to-order furniture for every room. When the first day of school arrived, all four schools were ready, on time and on budget.
